SUMMARY

- Software Development Engineer focused on AI/LLM applications, with production backend experience in Java, Spring Boot, and microservices, including 100+ REST APIs for Punjab National Bank and Saraswat Bank applications.
- Builds LLM applications with RAG, LangGraph multi-agent orchestration, multi-LLM routing, semantic caching, and guardrails, served through asynchronous Python/FastAPI backends and React.js frontends.

EXPERIENCE

In-Solutions Global | *Software Development Engineer* **Nov 2025 – Present**

- Migrated the PNB Genie banking platform from a monolithic Apache Struts application to Spring Boot microservices, decomposing it into App, User, SI (Standing Instructions), and Admin services that build and deploy independently.
- Developed 100+ RESTful APIs in Java with Spring Boot, JPA/Hibernate, and Oracle SQL supporting transaction workflows for Punjab National Bank and Saraswat Bank.
- Resolved defects raised during SIT and UAT cycles, re-validated fixes with Postman regression suites, and supported production releases of Maven-built services.

Yumedics Labs | *AI Engineer Intern* **Jun 2025 – Oct 2025**

- Built an AI-powered operations dashboard for Yumedics and Yuderma that ingests invoices arriving through Gmail and WhatsApp and processes them automatically, eliminating manual data entry for a 15-member field team.
- Implemented role-based access control (RBAC) with per-role data access, plus real-time activity tracking.
- Worked directly with the founders to turn manual business processes into automated workflows.

Web-Maken | *Full-Stack Developer Intern* **Jan 2025 – Jun 2025**

- Integrated REST APIs and synchronized product inventory for Brilliant Earth and Ritani to help maintain consistent product availability across platforms.
- Built client-facing API integrations, including a real-time restaurant ordering workflow and dynamic Jain Panchang calendar and festival data.

PROJECTS

Enterprise AI Platform | *Python, FastAPI, LangGraph, Qdrant, Redis, Docker* **GitHub**

- Built an enterprise AI copilot that answers questions over internal knowledge using Retrieval-Augmented Generation (RAG), with document embeddings stored and searched in the Qdrant vector database.
- Orchestrated specialized agents with LangGraph and placed an AI gateway in front of the models to route each request across multiple LLM providers.
- Added Redis-backed semantic caching so similar queries reuse earlier answers, and guardrails for PII detection and prompt-injection defense ahead of the model; containerized with Docker.

Full Stack Chatbot | *FastAPI, React.js, WebSockets, Redis Streams, GPT-J-6B* **GitHub**

- Built a real-time conversational AI app with a React.js frontend and a FastAPI WebSocket backend.
- Decoupled request handling from model inference with a Redis Streams producer-consumer pipeline, keeping the API responsive while GPT-J-6B generates replies via the Hugging Face Inference API; persisted chat history.

OptionOS – Real-Time BTC Options Analytics | *Python, FastAPI, React.js, WebSockets, IndexedDB* **GitHub**

- Built a real-time Bitcoin options analytics platform with a dual-WebSocket architecture that streams live options-chain and straddle data from a FastAPI backend to a React.js dashboard.
- Kept quotes in a strike-indexed in-memory cache for fast per-strike lookups, and aggregated the live stream into OHLC candles persisted in IndexedDB so charts load from the browser without refetching history.

SKILLS

Languages: Python, Java, JavaScript, SQL
AI & LLM: RAG, LangGraph, Multi-Agent Orchestration, Multi-LLM Routing, AI Gateway, Semantic Caching, AI Guardrails.
Backend & Frontend: FastAPI, Spring Boot, JPA/Hibernate, Django, Node.js, React.js, REST APIs, Microservices, WebSockets.
Databases & Messaging: Qdrant (Vector DB), Redis, Redis Streams, Apache Kafka, PostgreSQL, Oracle SQL, IndexedDB.
DevOps & Tools: Docker, Jenkins, CI/CD, AWS, Git, Maven, Postman, SIT/UAT Testing.

EDUCATION

Bachelor of Engineering (B.E.), Information Technology **2026**
Thakur College of Engineering and Technology (TCET), University of Mumbai, Mumbai, India | CGPA: 8.37 / 10
